

All-Rounder for Successful Advertising

In the graphic screen printing market, the applications are as versatile as the products to be printed. A successful print job requires the careful choice of the appropriate ink system. UV-curable screen printing inks offer many advantages for such demands, whether it is a question of speed, reliability, or process safety.

The most important features of UVAR are its universality and versatility, there's hardly any print job it's not suitable for. Ultra Graph UVAR is an "all-round talent" with easy handling even for demanding applications. Whether flexibility, chemical resistance, or outdoor suitability - Ultra Graph UVAR fulfils every requirement.

Applications

The wide substrate range for UVAR includes:

- Self-adhesive PVC and rigid PVC
- Polystyrene
- ABS
- PETG
- Polycarbonate
- Pre-treated Polypropylene
- Paper and cardboard

Comparison	UVAR	UVBR
Curing speed	++	++
Chemical resistance	++	++
Weather resistance	++	○
Range of substrates	+++	+
Flexibility	++	++

Your Benefits:

Extremely versatile on a wide range of materials

→ Universal use, one ink series for various application saves space and costs

Modern rheology and stable viscosity

→ Exceptional printability, easy to use, fewer rejects and machine stops

Very flexible ink film

→ Perfect for further processing, even for flexible substrates (not suited for soft PVC)

High reactivity

→ Particularly suitable for very fast printing speeds, even on multi-colour lines

High-quality pigmentation

→ Good light fastness, ideal for outdoor applications

Brilliant, glossy basic shades, satin gloss 4-colour process shades

→ Excellent appearance
